Subject Index

Accidents
influence of atmospheric environment upon the occurrence of, among construction workers, 749
Aerosols
source apportionment of, in the Tokyo metropolitan area by chemical element balances, 711
Air hygiene
climate and, in the urban industrial area of Mainz–Wiesbaden, F.R.G.: results of a long-term study with various monitoring systems, 677
Air pollutant concentration
wind circulation and, in the coastal city of Ravenna, 699
Air pollutants
the monitoring of, in Athens with particular reference to nitrogen dioxide, 637
Air pollution
urban, and the occurrence of bronchitis in Kuala Lumpur, Malaysia, 775
urban, climate and, in Shanghai, 647
Air pollution model
urban, 705
Air temperature
built environment and development control rules in Madras metropolis, India, 57
room, analysis of stochastic properties of, and heating load during autumn, 875
urban geometry, surface temperature and, 141
Air-conditioned building
analysis of stochastic properties of the heating load in an intermittently, by optimal control theory, 525
Air conditioners
determinant factors of indispensability of, for houses, 587
Air-conditioning
Tokyo weather data for: outdoor design conditions for heating and cooling loads by the TAC method, 263
Air-conditioning load calculation
an ARMA type weather model for heating, cooling and, 625
Air-conditioning savings
strategic landscaping and; a literature review, 479
Airflow flux structure
mean, affected by windbreaks, 299
Airflow regimes
modelling, in urban canyons, 315
Algae
blue-green, growth of cyanobacteria, on urban buildings, 499
Architecture
desert, vernacular climate control in, 809
ARMA type weather model
for air-conditioning, heating and cooling load calculation, 625
Aromatic hydrocarbons
polycyclic, size distribution of, in Chinese cities, 719
Artificial heat sources
thermal effects of, and shaded ground areas in the urban canopy layer, 253
Artificial substrates
effects of rooftop vegetation using, on the urban climate and thermal load of buildings, 435
Artificial water bodies
effects of revegetation and new, on the climate of northeast Mexico City, 447
Ash fall
volcanic, development of a ventilation system against, 663
Atmosphere
compressible, non-hydrostatic and wet, numerical modeling of, near a mountainous urban area, 1079
a study on the distribution of salt concentration in the, at coastal areas, 1069

Bioclimatic design course
for architectural students in Argentina: bridging the gap between climate and design, 43
Breeze(s)
country, significance of, for urban planning, 291
sea, cooling effects of a river and, on the thermal environment in a built-up area, 973
sea–land, statistical analysis of the characteristics of, and its effect on urban thermal environment, 1003
Bronchitis
urban air pollution and the occurrence of, in Kuala Lumpur, Malaysia, 775
Building
numerical study of heat storage in a, 577
Building energy management
climate and, 599
Building scale
bridging the gap between climate and design at the urban and, research and application, 51
Building science
issues of urban and building climatology for, 399
Building sector
energy conservation programme of Pakistan, 533
Building syndrome
tight on sick, 795
Buildings
as climate modifiers, 907
directional wind-chill data for planning sheltered microclimates around, 887
effects of vegetation on urban climate and, 507
government office, energy conservation guidelines for, in New Delhi, 617
mapping and measuring, in the canopy boundary layer in ten U.S. cities, 1025

Elsevier Sequoia/Printed in The Netherlands

residential, a simple computer model for estimating the energy consumption of, in different microclimatic conditions in cold regions, 561
single-storey, a study of daylight in the planning of, 367
urban, growth of cyanobacteria (blue-green algae) on, 499
Built environment
air temperature, and development control rules in Madras metropolis, India, 57
Built form
of Shahjahanabad (Old Delhi): an evaluation from the climatic point of view, 895

Canopy boundary layer
mapping and measuring buildings in the, in ten U.S. cities, 1025
Catastrophes
flood, causes and effects of, in the Alpes — examples form summer 1987, 1085
Chemical element balances
source apportionment of aerosols in the Tokyo Metropolitan Area by, 711
City
ancient historic, climatic rehabilitation of an, — Bet Shéan master plan, 23
Climate
and air hygiene in the urban industrial area of Mainz–Wiesbaden, F.R.G.: results of a long-term study with various monitoring systems, 677
and building energy management, 599
and housing form — a case study of New Delhi, 837
and human health in the Parisian region, 735
and pollution in Paris, 673
and urban planning; example of the planning code for Vicente Lopez, Buenos Aires, 35
bridging the gap between, and design at the urban and building scale: research and application, 51
bridging the gap between, and design: a bioclimatic design course for architectural students in Argentina, 43
city, how to meet an increasing concern of citizens in a, 11
effects of revegetation and new artificial water bodies on the climate of northeast Mexico City, 447
Shanghai urban, the turbidity effect in, 657
the Tropical Urban, Experiment (TRUCE), 67
urban, and air pollution in Shanghai, 647
urban, effects of vegetation on, and buildings, 507
Climate control
vernacular, in desert architecture, 809
Climate modifiers
buildings as, 907
Climate rehabilitation
of an ancient historic city — Bet Shéan master plan, 23
Climate-sensitive design
considerations for, in tropical Africa, 15
Climatic aspects
in the building of ancient urban settlements in Israel, 93
Climatic effects
of land reclamation in Tokyo Bay — numerical experiment, 147
Climatic environment
characteristics of remodeling or reconstruction of the traditional urban house in Japan and, 851
traditional landscapes in Japan with regard to geographical, hydrological and, 471
Climatic factors
combined effects of, on the seasonal termite damage to structural wood in a semi-arid urban system, 947
Climatic maps
a study on drawing, related to human thermal sensation, 1011
Climatic point of view
evaluation from: built form of Shahjahanabad (Old Delhi), 895
Climatic reference points
for some aspects of engineering design in Nairobi, Kenya, 801
Climatic variations
urban, studies on, 119
Climatology
building, the issues of urban and, for building science, 399
diffusion, a study on, over Delhi, 75
urban, development of, and problems today, 1
urban, in Malaysia: an overview, 105
Coastal areas
a study on the distribution of salt concentration in the atmosphere at, 1069
Coastal atmospheric environment
numerical investigation of, influenced by a small-scale peninsula, 979
Coastal city
wind circulation and air pollutant concentration in the, of Ravenna, 699
Cold air lake
heat island of a small city and its influences on the formation of a, and radiation fog in Xishuangbanna, tropical China, 157
Cold climates
accidental hypothennia caused by, in urban areas, 791
Cold regions
a simple computer model for estimating the energy consumption of residential buildings in different microclimatic conditions in, 561
Concrete surfaces
guidelines for the selection of external protective wall finishes for smooth, in Hong Kong, 957
Construction workers
influence of atmospheric environment upon the occurrence of accidents among, 749
Cooling
passive, mass housing based on traditional design and indigenous materials for, in the tropical urban climate of the Philippines, 925
Cooling load calculation
an ARMA type weather model for air-conditioning, heating and, 625

Cooling loads
outdoor design conditions for heating and, by the TAC method: Tokyo weather data for air-conditioning, 263
Cyanobacteria
growth of, (blue-green algae) on urban buildings, 499

Daylight
a study of, in the planning of single-storey buildings, 367
Design
bridging the gap between climate and, at the urban and building scale: research and application, 51
bridging the gap between climate and: a bioclimatic design course for architectural students in Argentina, 43
climate-sensitive, considerations for, in tropical Africa, 15
engineering, on climatic reference points for some aspects of, in Nairobi, Kenya, 801
traditional, mass housing based on, and indigenous materials for passive cooling in the tropical urban climate of the Philippines, 925
urban environmental, of land use in Tokyo metropolitan area, 133
Desert architecture
vernacular climate control in, 809
Development control
potential of land-use planning and, to help achieve favourable microclimates around buildings: a European review, 823
Development control rules
air temperature, built environment and, in Madras metropolis, India, 57
Diffusion climatology
a study on, over Delhi, 75
Diffusion field
numerical simulation of velocity field and, in an urban area, 345
Dilution factors
urban morning, 221
Discomfort
caused by wide-source glare, 391
District heating
study on heat source for, in Tokyo, 571
Dust concentration
high, meteorological factors causing, 691

Earth's surface conditions
some studies on, relating to the urban heat island, 279
Economy
a linear goal programming model for urban energy–economy–environment interaction, 537
Ecosystem
urban area as a part of an, 129
Energy balance
field measurements on, of an urban canyon in the summer season, 417
Energy balance method
new twin, evaluation of the thermal environment in the building areas of Kuala Lumpur city by a, 271
Energy conservation guidelines
for government office buildings in New Delhi, 617
Energy conservation programme
building sector, of Pakistan, 533
Energy consumption
a simple computer model for estimating the, of residential buildings in different microclimatic conditions in cold regions, 561
Energy management
building, climate and, 599
Energy recycling system
for urban waste heat, 553
Environment
atmospheric, influence of, upon the occurrence of accidents among construction workers, 749
coastal atmospheric, numerical investigation of the, influenced by small-scale peninsula, 979
a linear goal programming model for urban energy–economy–environment interaction, 537
Environmental design
urban, of land use in Tokyo metropolitan area, 133

Factors of indispensability
determinant, of air conditioners for houses, 587
Flood catastrophes
causes and effects of, in the Alpes — examples of summer 1987, 1085

Glare
wide-source, discomfort caused by, 391
Green areas
study of the effect of, on the thermal environment in an urban area, 449
urban, simulation of thermal effects of, on their surrounding areas, 443

Health
human, and social factors in winter climates, 765
human, climate and, in the Parisian region, 735
Heat
exhaust, conversion of, to latent heat for the management of the thermal environment in urban areas, 609
urban waste, energy recycling system for, 553
Heat island(s)
effect of, over urban Madras and measures for its mitigation, 245
of a small city and its influences on the formation of a cold air lake and radiation fog in Xishuanghanna, tropical China, 157
urban, some studies on earth's surface conditions relating to the, 279
Heat island model
changing Tokyo metropolitan area and its, 191
Heat island phenomenon
fundamental characteristics of, thermal plume from a heat source in thermally stable stratified air, 183
Heat source(s)
artificial, thermal effects of, and shaded ground areas in the urban canopy layer, 253
study on, for district heating in Tokyo, 571
Heat storage
numerical study of, in a building, 577

Heating load(s)
analysis of stochastic properties of room air temperature and, during autumn, 875
analysis of stochastic properties of the, in an intermittently air-conditioned building by optimal control theory, 525
outdoor design conditions for, and cooling loads by the TAC method: Tokyo weather data for air-conditioning, 263
Heating load calculation
an ARMA type weather model for air-conditioning, cooling and, 625
Hospital wards
investigations of the microclimate in, 727
House(s)
determinant factors of indispensability of air conditioners for, 587
traditional urban, characteristics of remodeling or reconstruction of the, in Japan and climatic environment, 851
Housing
mass, based on traditional design and indigenous materials for passive cooling in the tropical urban climate of the Philippines, 925
Housing form
climate and, — a case study of New Delhi, 837
Hydrological environment
traditional landscapes in Japan with regard to climatic, geographical and, 471
Hypobaric conditions
effects of, on man's thermal responses, 755
Hypothermia
accidental, caused by cold climates in urban areas, 791
Insolation
influence of, and topography on the landscape of settlement in the Nyu Ravine, Nara, 385

Kalman filter
statistical time series models of solar radiation and outdoor temperature — identification of seasonal models by, 373

Land cover ratio
estimation of, using remote sensing data (LANDSAT MSS) for investigating thermal properties of urban areas, 177
Land coverage classification
a study of the accuracy of, with remote-sensing data, 1063
Land reclamation
climatic effects of, in Tokyo Bay — numerical experiment, 147
Land use
calculation of sunshine duration and saving of, in urban building design, 407
effects of, on urban horizontal atmospheric temperature distributions, 165
urban environmental design of, in Tokyo metropolitan area, 133
Landscape(s)
changes of, and dwellings with windbreaks caused by urbanization in central Japan, 305
influence of insolation and topography on the, of settlement in the Nyu Ravine, Nara, 385
traditional, in Japan with regard to climatic, geographical and hydrological environment, 471
Landscaping
strategic and air-conditioning savings: a literature review, 479
Land-use planning
potential of, and development control to help achieve favourable microclimates around buildings: a European review, 823

Mapping
and measuring buildings in the canopy boundary layer in ten U.S. cities, 1025
urban topoclimates, 1059
Maps
climatic, a study on drawing, related to human thermal sensation, 1011
Meteorological data analysis
Buenos Aires urban, of a five-day period, 339
Meteorological factors
causing high dust concentration, 691
Meteorological record
an examination of the, for Durham University Observatory in the north-east of England: the value of long-period observatory records, 1051
Microclimate(s)
favourable, potential of land-use planning and development control to help achieve, around buildings: a European review, 823
in tropical urban complexes, 83
investigations of the, in hospital wards, 727
sheltered, directional wind-chill data for planning, around buildings, 887
Mixing heights
and wind direction analysis for urban and suburban areas of Buenos Aires city, 333
Moisture behavior
numerical analysis of, in a porous wall by quasi-linearized equations, 861
Moisture variation
annual, a study of, in an internally insulated building wall under a mild climate using a small-scale model and the similarity laws, 933

Nitrogen dioxide
and oxidant in an urban region of Delhi, India, 683
the monitoring of air pollutants in Athens with particular reference to, 637

Observatory records
the value of long-period; an examination of the meteorological record for Durham University Observatory in the north-east of England, 1051
Optimal control theory
analysis of stochastic properties of the heating load in an intermittently air-conditioned building by, 525
Outdoor conditions
improving indoor thermal comfort by changing, 743
Outdoor environment
design criteria for solar access and wind shelter in the, 425

Oxidant
nitrogen dioxide and, in an urban region of Delhi, India, 683

Passive cooling
mass housing based on traditional design and indigenous materials for, in the tropical urban climate of the Philippines, 925
Peninsula
small-scale, numerical investigation of the coastal atmospheric environment influenced by a, 979
Planning
of single-storey buildings, a study of daylight in the, 367
urban, and climate: example of the planning code for Vicente Lopez, Buenos Aires, 35
urban, significance of country breezes for, 291
Pollution
climate and, in Paris, 673
urban air, and the occurrence of bronchitis in Kuala Lumpur, Malaysia, 775
Pollution model
urban air, 705
Pond
large, a comparison of field surveys on the thermal environment in urban areas surrounding a, when filled and when drained, 965
Precipitation
convective, influence of a large urban park on temperature and, in a tropical city, 457

Radiation fog
heat island of a small city and its influences on the formation of a cold air lake and, in Xishuangbanna, tropical China, 157
Rainfall
statistical analysis of increasing urbanization and changing trends of temperature and: urban climate in Tamil Nadu, India, 231
Rehabilitation
climatic, of an ancient historic city — Bet Shéan master plan, 23
Remote sensing data
estimation of land cover ratio using, (LANDSAT MSS) for investigating thermal properties of urban areas, 177
a study of the accuracy of land coverage classification with, 1063
Revegetation
effects of, and new artificial water bodies on the climate or northeast Mexico City, 447
River
cooling effects of a, and sea breeze on the thermal environment in a built-up area, 973
a study of the effects of a, on the thermal environment in an urban area, 993
Room air temperature
analysis of stochastic properties of, and the heating load during autumn, 875

Salt concentration
a study on the distribution of, in the atmosphere at coastal areas, 1069
Sea breeze
cooling effects of a river and, on the thermal environment in a built-up area, 973
Sea–land breeze
statistical analysis of the characteristics of, and its effects on urban thermal environment, 1003
Settlement
influence of insolation and topography on the landscape of, in the Nyu Ravine, Nara, 385
Shaded ground areas
thermal effects of artificial heat sources and, in the urban canopy layer, 253
Sheltered microclimates
directional wind-chill data for planning, around buildings, 887
Sick building syndrome
tight or, 795
Social factors
human health and, in winter climates, 765
Solar access
design criteria for, and wind shelter in the outdoor environment, 425
Solar radiation
statistical time series models of, and outdoor temperature — identification of seasonal models by Kalman filter, 373
Sunshine duration
calculation of, and saving of land use in urban building design, 407

Temperature
effect of vegetation on surface, in urban and suburban areas in winter, 465
influence of a large urban park on, and convective precipitation in a tropical city, 457
maximum and minimum, changes in number of days exceeding certain values of, 213
outdoor, statistical time series models of solar radiation and, — identification of seasonal models by Kalman filter, 373
statistical analysis of increasing urbanization and changing trends of, and rainfall: urban climate in Tamil Nadu, India, 231
surface, urban geometry and air temperature, 141
Temperature distributions
urban horizontal atmospheric, effects of land use on, 165
Termite damage
seasonal, combined effects of climatic factors on the, to structural wood in a semi-arid urban system, 947
Thermal comfort
improving indoor, by changing outdoor conditions, 743
Thermal effects
simulation of, of urban green areas on their surrounding areas, 443
Thermal environment
a comparison of field surveys on the, in urban areas surrounding a large pond when filled and when drained, 965

conversion of exhaust heat to latent heat for the management of the, in urban areas, 609
cooling effects of a river and sea breeze on the, in a built-up area, 973
evaluation of, in the building areas of Kuala Lumpur city by a new twin energy balance method, 271
study of the effect of green areas on the, in an urban area, 493
study of the effects of a river on the, in an urban area, 993
urban, statistical analysis of the characteristics of sea–land breeze and its effects on, 1003
Thermal load
effects of rooftop vegetation using artificial substrates on the urban climate and, of buildings, 435
Thermal plume
from a heat source in thermally stable stratified air: fundamental characteristics of the heat island phenomenon, 183
Thermal responses
man's, effects of hypobaric conditions on, 755
Thermal sensation
human, study on drawing climatic maps related to, 1011
Topoclimates
urban, mapping, 1059
Topography
influence of insolation and, on the landscape of settlement in the Nyu Ravine, Nara, 385
Tropical africa
considerations for climate-sensitive design in, 15
Tropical China
heat island of a small city and its influences on the formation of a cold air lake and radiation fog in Xishuangbanna, 157
Tropical city
influence of a large urban park on temperature and convective precipitation in a, 457
Tropical climates
performance of external wall systems in, 917
Tropical urban climate
mass housing based on traditional design and indegenous materials for passive cooling in the, of the Philippines, 925
Tropical Urban Climate Experiment
(TRUCE), 67
Tropical urban complexes
microclimates in, 83
Tropics
living in the, — can it be better?, 817
TRUCE
the Tropical Urban climate Experiment, 67
Turbidity island effect
in Shanghai urban climate, 657

Urban air pollution
and the occurrence of bronchitis in Kuala Lumpur, Malaysia, 775
Urban and suburban areas
effect of vegetation on surface temperature in, in winter, 465
of Buenos Aires city, mixing heights and wind direction analysis for, 333
Urban area(s)
accidental hypothermia caused by cold climates in, 791
as a part of an ecosystem, 129
a comparison of field surveys on the thermal environment in, surrounding a large pond when filled and when drained, 965
conversion of exhaust heat to latent heat for the management of the thermal environment in, 609
estimation of land cover ratio using remote sensing data (LANDSAT MSS) for investigating thermal properties of, 177
mountainous, numerical modeling of a compressible, non-hydrostatic and wet atmosphere near a, 1079
numerical simulation of velocity field and diffusion field in an, 345
study of the effect of green areas on the thermal environment in an, 493
study of the effects of a river on the thermal environment in an, 993
utilization of wind energy in, — chance or utopian dream?, 517
Urban building design
calculation of sunshine duration and saving of land use in, 407
Urban buildings
growth of cyanobacteria (blue-green algae) on, 499
Urban canopy layer
thermal effects of artificial heat sources and shaded ground areas in the, 253
Urban canyon(s)
field measurements on energy balance of an, in the summer season, 417
modelling airflow regimes in, 315
Urban canyon wind flow model
preliminary field test of an, 325
Urban climate
and air pollution in Shanghai, 647
effect of vegetation on, and healthy urban colonies, 487
effects or rooftop vegetation using artificial substrates on the, and the thermal load of buildings, 435
effects of vegetation on, and buildings, 507
in Tamil Nadu, India: statistical analysis of increasing urbanization and changing trends of temperature and rainfall, 231
tropical, mass housing based on traditional design and indigenous materials for passive cooling in the, of the Philippines, 925
the turbidity island effect in Shanghai, 657
Urban Climate Experiment
Tropical, TRUCE, 67
Urban climatic variations
studies on, 119
Urban climatology
development of, and problems today, 1
in Malaysia: an overview, 105
issues of building and, for building science, 399
Urban complexes
tropical, microclimates in, 83

Urban dilution
morning factors, 221
Urban energy
a linear goal progamming model for urban energy–economy–environment interaction, 537
Urban environmental design
of land use in Tokyo metropolitan area, 133
Urban geometry
surface temperature and air temperature, 141
Urban green areas
simulation of thermal effects of, on their surrounding areas, 443
Urban heat island
some studies on earth's surface conditions relating to the, 279
Urban house
traditional, characteristics of remodeling or reconstruction of the, in Japan and climatic environment, 851
Urban industrial area
climate and air hygiene in the, of Mainz–Wiesbaden, F.G.R.: results of a long-term study with various monitoring systems, 677
Urban meteorological data analysis
Buenos Aires, of a five-day period, 339
Urban model
air pollution, 705
Urban park
influence of a large, on temperature and convective precipitation in a tropical city, 457
Urban planning
and climate: example of the planning code for Vicente Lopez, Buenos Aires, 35
significance of country breezes for, 291
Urban region
nitrogen dioxide and oxidant in an, of Delhi, India, 683
Urban scale
bridging the gap between climate and design at the urban and building scale: research and application, 51
Urban settlements
ancient, climatic aspects in the building of, in Israel, 93
Urban system
semi-arid, combined effects of climatic factors on the seasonal termite damage to structural wood in a, 947
Urban temperature distributions
horizontal atmospheric, effects of land use on, 165
Urban thermal environment
statistical analysis of the characteristics of sea–land breeze and its effects on, 1003
Urban topoclimates
mapping, 1059
Urban warming
effect of, on blooming of *Prunus yedoensis*, 205
Urban waste heat
energy recycling system for, 553
Urban wind fluctuation
cross-correlation between speed and direction of, 357
Urbanization
changes of landscape and dwellings with windbreaks caused by, in central Japan, 305

Vegetation
effect of, on surface temperature in urban and suburban areas in winter, 465
effect of, on urban climate and healthy colonies, 487
effects of, on urban climate and buildings, 507
rooftop, effects of, using artificial substrates on the urban climate and the thermal load of buildings, 435
Velocity field
numerical simulation of, and diffusion field in an urban area, 345
Ventilation system
development of a, against volcanic ash fall in Kagoshima, 663
Vernacular climate control
in desert architecture, 809

Wall
internally insulated building, a study of moisture variation in an, under a mild climate using a small-scale model and similarity laws, 933
porous, numerical analysis of moisture behavior in a, by quasi-linearized equations, 861
Wall finishes
external protective, guidelines for the selection of, for smooth concrete surfaces in Hong Kong, 957
Wall systems
external, performance of, in tropical climates, 917
Waste heat
urban, energy recycling system for, 563
Water bodies
new artificial, effects of revegetation and, on the climate of northeast Mexico City, 447
Weather data
Tokyo, for air-conditioning: outdoor design conditions for heating and cooling loads by the TAC method, 263
Weather model
an ARMA type, for air-conditioning, heating and cooling load calculation, 625
Wind circulation
and air pollutant concentration in the coastal city of Ravenna, 699
Wind direction analysis
and mixing heights, for urban and suburban areas of Buenos Aires city, 333
Wind energy
utilization of, in urban areas — chance or utopian dream?, 517
Wind flow model
urban canyon, preliminary field test of an, 325
Wind fluctuation
urban, cross-correlation between speed and direction of, 357
Wind shelter
design criteria for solar access and, in the outdoor environment, 425

Windbreaks
changes of landscape and dwellings with, caused by urbanization in central Japan, 305
mean airflow flux structure affected by, 299
Wind-chill data
directional, for planning sheltered microclimates around buildings, 887
Winter climates
human health and social factors in, 765
Wood
structural, combined effects of climatic factors on the seasonal termite damage to, in a semi-arid urban system, 947
